

# REPAIR-SERVICE!

## COST LIMITS

The following overview shows the tool types and the respective cost limits which may be incurred as a maximum for a repair with effect from **1 January 2025**. You will no longer have to pay any more than the amount shown for any tool repair, with immediate effect. Device repairs whose costs exceed the specified cost limit are treated as a total economic loss. If a repair is nevertheless possible, we will send you a cost estimate. Device repairs that constitute a total economic loss and can no longer be repaired are excluded from the cost limit regulation. In this case, we will contact you to provide you with a quote for a new device.

## NEW TOOLS FOR A FIXED PRICE

Device types that are not listed in the table are not repaired as part of our service, but are exchanged directly for a new device. If you are already a contractual partner of GESIPA®, the terms and conditions agreed with you will of course apply.

TOOL GROUPS	TOOL NAME	COST LIMIT*
